

Chapter 5

First Contact with an ET

This chapter examines the claim by CRAIG EBRAHIMI that he is an alien. It will also examine evidence that I have (since January 26, 2020) suggesting that Craig is responsible for bringing COVID-19 to Earth and, with Chinese and American help, spreading it around our planet. Craig is shown on data-packed Figure 5-1 below. The chapter will also examine evidence that the vector of the contamination was a 27-pound meteorite that he recovered from the seafloor off his current hometown of Sooke, British Columbia, in the Canadian waters of the Strait of Juan De Fuca.

Aliens who allegedly met President Eisenhower at Muroc (Edwards) Air Force Base on February 20, 1954 wore uniforms with triangles on them. This figure was also on their spacecraft. On the best photo of Craig (taken about 20 minutes after I angered him), he is wearing a triangle on his (uniform?) shirt. Craig is also wearing a necklace with one of what he claims are 16 alien embryos that he owns.

Corporate of Altair Symbol
Headquarters of a collective based on Altair 4 and which maintains dodgy ties with Ashtar and Draconian collectives at the same time. This is a mixed group composed of a blond humanoid race that co-operates with a race of Greys. The Corporate is not part of the Draconian Empire but is heavily involved in abductions and interbreeding blond Altairians and humans in connivance with the U.S. government. We maintain a military detachment and a U.S. - Telos Military Alliance with them.

The above photo was taken on April 30, 2020 shortly after we had an argument. He said, he had run 35 km earlier that day. His email to me with this photo went out at 11:35 pm (Eastern time).

An alleged alien embryo is inside Craig's necklace.

Receipt for sending a meteorite sample with an embryo to Professor Chandra Wickramasinghe on June 19, 2018.

Ebrahimi Email Quotes:
March 17, 2020 to Roffman:
you got to be one the biggest dummie humans I ever came across you talk this shit in your writing ABOUT my biotechnology, once again your dumb! you don't even know your dealing with fucking real extra-terrestrial self made multi millionaire since teens you idiot, if you looked into these eyes I would eat your soul puppet boy."
July 12, 2020 to Wickramasinghe:
I am far from human."

Figure 5-1 – Craig Ebrahimi, possible alien.

Source material: This chapter includes a scientific analysis of Craig's unusual meteorite. While Chapter 6 details our e-mail record for more than a year, Chapter 5 includes Torah Code matrices that relate to Craig.

INITIAL CONTACT WITH CRAIG: I received the following email on January 26, 2020:

My name is Craig Ebrahimi, research scientist/Founder of Deviant off-world technology. Barry, would you be interested in the research and biotechnology opportunity of the only pristine extraterrestrial embryo on the planet at the University of Victoria?

In the two months that followed, I grilled him often and hard. I also angered him a lot. Eventually, he sent me the photo shown in Figure 5-1, but before doing so, he sent me the following e-mail on March 17, 2020, when he was angry with me, in which he wrote that he is himself an alien:

On Fri, Mar 27, 2020 at 4:43 PM Craig Ebrahimi craigebrahimi@hotmail.com wrote:

*“Guy, your dumb ass shit keeps getting sent to me by one of your Hebrew followers. You gotta be one of the biggest dummy humans I ever came across. You talk this shit in your writing ABOUT my biotechnology. Once again, you're dumb! **You don't even know you're dealing with a fucking real extra-terrestrial self-made multi-millionaire since teens, you idiot. Figure 5-6 above: This receipt marks the beginning of the transfer of Craig's contaminated meteorite sample with alien embryonic samples and possible surviving viruses to Professor

Wickramasinghe in the UK and to Chinese Professor Jingwen Qu, at the Center for Infectious Disease Control in Tianjin, China, and its parent Chinese Army.

PROFESSOR CHANDRA WICKRAMASINGHE

This leading virologist was first to receive a sample of the Ebrahimi Meteorite. Craig shipped it to him at the University of Buckingham. Wickramasinghe then shipped it to his home in Sir Lanka where he apparently lied about it being stolen. In actuality he published four months later with Jiangwen Qu of The Tianjin, China Center for Infectious Disease Control and together they predicted the Wuhan pandemic.

The Cosmic Truth

Leading scientist predicted pandemic on November 25th, 2019 -

Figure 5- 7 above: Arch-villain Wickramasinghe is among the most guilty when it comes to the murder of millions of people via COVID-19.

4 Months later Wickramasinghe and Qu publish a warning of a pandemic in 2019.

Humphrey waits until May 2019 to ask Wickramasinghe about Craig's rocks.

Figure 5-8 above: There is a clear publication record that allows us to learn that this disease was deliberately spread.

Wickramasinghe, who had Craig's meteorite in 2018, continued working with Jiangwen Qu in Tianjin, China to predict the coming 2019-2020 pandemic.

Abstract

→ In fact, new viral infections are predictable. In a letter entitled with "Space weather and pandemic warnings?" to *Current Science* published in November 2019, we explicitly reminded the world that new infective viruses are likely to emerge in the coming months during the lowest minimum of the sunspot cycle in over a hundred years, and that public health authorities must be vigilant and take necessary action⁶. The emergence of the 2019 Novel Coronavirus, in our view, confirms this prediction and highlights the urgency of taking appropriate precautions without further

Figure 5-9 above: Hidden warnings about Craig's unusual rock spread quickly in China.

趣味探索讯：在20世纪，最振奋人心的大新闻无非就是人类成功登上月球。在1961年至1972年期间，美国对月球实行的一系列登月计划，成功将12名美国宇航员先后送上月球。

他们在月球上又是行走，又是驾车，又是科学测量，又是收集样品，看起来好不兴奋。让世界各国羡慕不已，无不惊叹美国的黑科技，因为其他国家连造车技术都没有掌握。

阿波罗16号六次成功登月，给美国带回了近382公斤月球样本，样本总数多达数万个，其中最引人注目的是一些形状怪异的岩石，在过去近50年时间里，这些月球样本一直被封存于休斯顿一个名为月球接收实验室的特定样品库内。

不过现在美国宇航局（NASA）计划在2024年重返月球，需要月球样品率先对月球进行一番了解，确定登月任务，所以这些尘封已久的月球样品才再次重见天日。

在2019年里，美国宇航局（NASA）先后对多个月球陨石进行深入探究，而一个重达27磅的月球陨石引起了科学家的注意，因为在使用非破坏性技术拉曼光谱进行分析时，意外发现陨石中疑似存在生物胚胎结构。

科学家克雷格·埃布拉希米（Craig Ebrahimi）在接受媒体独家专访时讲述了惊人发现，由于该结构看起来非常逼真，多名科学家怀疑陨石中白色透明结构可能呈现生物胚胎，又或者是个地外有机体。

所以美国宇航局ARES部门专家正对该结构做进一步研究，准备花费数十亿美元，欲用最先进

Experience

Dr. Humphrey began work at the University of Victoria on March 1, 2009 as the laboratory lab manager and STEHM technologist for the new Advanced Microscopy Facility. This position entailed building a world-class microscopy facility with responsibility for all aspects of running the lab.

Figure 5-12 above: Dr. Elaine Humphrey was the next major scientist to study Craig's meteorite. I interviewed her several times. She was somewhat nervous about what she was finding, because, as Figure 5-12 shows, weird things were happening with the temperature of the rock. In fact, the temperature fluctuations are suggestive of viral activity.

Faces in the Meteorite

Craig Ebrahimi found a special rock when diving underwater.

With a diamond saw, he took off the end to use for analysis and polished the face of the rock.

In order to prove it was a meteorite, he sent a sample to the prestigious Actlabs for analysis and it came back supporting that it is a meteorite. The oxygen isotopes came back as lunar origin.

It is a weird rock: the surface face takes heat away and is so cold, water condenses onto it; even after the rock has been in room temperature for months.

Looking closely with a hand lens, there are a surprising number of different faces in the grains of the rock.

Dr. Elaine Humphrey, University of Victoria,
<https://www.uvic.ca/research/advancedmicroscopy/>

Dr. Humphrey's phone number was given here but is removed for her privacy.

**"It is a weird rock: the surface face takes heat away and is so cold water condenses onto it; even after the rock has been in room temperature for months."
(Dr. Elaine Humphrey)**

Figure 5-13 above: Dr. Humphrey noted the unusual heat (really, cold) properties of the meteorite. This may suggest that living viral processes are at work in the rock.

PAREIDOLIA OR A REAL FACES?

Dr. Humphrey said, “All the grains of rock have faces in them. It’s fascinating, but I’m telling you it’s an illusion. It’s still an interesting rock, and the more we look at it, the more interesting it gets.”

PAREIDOLIA OR A REAL EMBRYO?

- Pareidolia is the tendency to perceive a specific, often meaningful image in a random or ambiguous visual pattern.
- The Ebrahimi meteorite poses two potential threats. One is that it may be the source of COVID-19
- The second threat is that if not an example of pareidolia, it is touted as having multiple alien embryos. Even if not the source of COVID-19, it may still constitute a bio-hazard.

Figure 5-14 above: Pareidolia does not explain temperature fluctuations. My experience in interviewing Humphrey leads me to believe that she is very much aware of, and afraid of, the consequences of having alien life or proof of alien life in her laboratory.

DURING THE 2020 PANDEMIC WICKRAMASINGHE TELLS CRAIG HE HAS THE CURE FROM SPACE

From: Chandra Wickramasinghe <newick@gmail.com>

Sent: March 15, 2020 10:46 AM

To: Craig Ebrahimi <craigebrahimi@hotmail.com>

Subject: Re: longevity vaccine from space

Hello Craig

Yes, I would much like to help. I believe you have the cure from space but I don't have the institutional resources available to me.

C

Personal website: Profchandra.org

Buckingham astrobiology website: <https://www.buckingham.ac.uk/research/bcab>

Ruhuna astrobiology website: <http://physics.ruh.ac.lk/astrobiology/>

ISPA website: www.ispajapan.com

Figure 5-15 above: This claim of Wickramasinghe's lack of resources does not stack up well with his claim later that somebody broke into his outhouse in Sri Lanka, where he stored the meteorite, and somebody stole it! Know that Wickramasinghe is one of the world's leading advocates of panspermia, which states that things like meteorite impacts and solar wind can transfer life from one world to another. He knew a meteorite with proof of life embedded in it would be worth billions of dollars. And yet he says he just left the sample in outhouse? That is utterly unbelievable!

From the moment I met Craig, he worked hard to try to convince me to help him sell his rock to biopharma. When he finally saw (after COVID-19 started killing so many of us) that I could not be swayed to help him enlist Elon Musk or Bill Gates to produce a vaccine, that's when he boasted about his wealth while cursing me out and bragging that he is an ET:

"...You got to be one of the biggest dummy humans I ever came across. You talk this shit in your writing ABOUT my biotechnology, once again you're dumb! You don't even know you're dealing with a fucking real extra-terrestrial self-made multi-millionaire since teens, you idiot. If you looked into these eyes, I would eat your soul, puppet boy."

When following the money to the wealth involved with Craig's acts, we need to keep an eye on Craig and all his associates and follow the money. This includes joint publishers Wickramasinghe and Gensuke Tokoro, shown on the slide below.

**ON 4/1/2020 WICKRAMASINGHE AND
JIANGWEN QU OF THE TIAJIN (CHINA)
CENTER FOR DISEASE CONTROL
PUBLISHED COMMENTS ON THE ORIGIN
AND SPREAD OF THE 2019 CORONAVIRUS**

Their publication group included GENSUKE TOKORO of the Institute for the Study of Panspermia and Astroeconomics, Gifu, Japan. Tokoro may try to sell any cure developed from Craig's meteorite. Tokoro is president and CEO of Kyoto Biopharma, Inc., and executive director of ISPA. He lives in Japan.

GENSUKE TOKORO

Gensuke Tokoro is an honorary professor at Ruhuna University, president and CEO of Kyoto Biopharma, Inc., and executive director of ISPA. He lives in Japan.

Figure 5-16: There was a widespread interest in what Craig was offering, but a great need for them not to go public about it. Craig even reached out to Elon Musk before he turned to me. However, once I angered him with demands for loyalty to the scientific method, he offered changing stories. He altered his story about an early meeting with Musk. But photographic evidence suggests that Craig's original boast was correct.

Jerzy Sawicki and Elon E-Mails Accidentally Transmitted to Me:

The Geiger meter was when Dr. Jerzy (Sawicki) was involved. He is a Polish senior who went absolutely crazy with this project. He would never sleep and started drinking vodka. We had a falling out when he randomly asked me for \$100,000 immediately when he heard I was meeting with Elon.

The instrument the US scientist used, I have been looking for notes on what it was called. I will contact him.

Jerzy A. Sawicki's Lab

Figure 5-17 above: At one point, Dr. Sawicki quit working for Craig. However, I convinced Craig to repair their rift. My concern was that Sawicki was vital for determining the origin of the meteorite. Craig claimed that “voices he heard in his head” gave him the exact coordinates of the meteorite. That sounds a lot like how aliens are believed to communicate by telepathy. Prove that the meteorite has life or remains of life, and you go a long way toward proving that Craig is also an alien (as he claims to be). Sawicki published a joint paper with Ebrahimi about the meteorite in question. See their paper here and below as Figure 5-18.

UNUSUAL ACHONDRITE-LIKE FIND IN SOOKE BASIN: RESULTS OF FIRST ANALYSES.

J. A. Sawicki¹ and C. Ebrahimi², ¹Interatomics, Victoria, BC, V8P 1E3, ²Sooke, BC, V9Z 0X3, Canada

Introduction: The achondrite-like stone examined here was discovered by Craig Ebrahimi during diving in Sooke Basin with JW Pulse 8X induction metal detector. The stone was at 12 m depth and under 3 m of anoxic mud, about 100 m from east shore of Sooke Basin, a 10 km² body of sea water connected to the Juan de Fuca Strait at the Southern tip of Vancouver Island. This area was populated long time ago by the T'sou-ke Nation of the Coast Salish. The Juan de Fuca Ice Lobe of the Cordilleran Ice Sheet advanced and receded many times until ~15,000 years BP and likely deposited meteorites from the glacier. The find weighs ~13 kg, attracts a magnet, and is up to 70% covered by black fusion crust about 0.5 to 1 mm thick.

Fig. 1. Photograph of the find, without a cut section.

Analyses:

Chemistry: Using fusion ICP and Na₂O₂ techniques, Actlabs in Ancaster, Ontario, determined LOF=3.45% and elements in proportions characteristic of achondrites - likely from Mars or 4 Vesta. In the Korotev's plots our data in wt% vs. Fe₂O₃+MgO=29.55 are all located in achondrite areas: 45.95 SiO₂ in lunar, HED or Mars; 17.90 MgO and 1.5 MgO/Fe₂O₃ above HED and Mars; 5.30 Al₂O₃ in Mars; 14.74 CaO in lunar, Mars or other; 2.78 CaO/Al₂O₃ in Mars or other; 11.65 Fe₂O₃ below lunar, HED and Mars; Fe₂O₃/MnO=77.7 in lunar and other; 0.36 Na₂O in lunar, HED and near Mars; 0.08 K₂O in lunar, HED and Mars, and 940 ppm Cr as in Mars. Low amount of Na₂O+K₂O=0.44 vs. 45.95 SiO₂ places our find in the left corner of SNC meteorites area [5]. There are also 0.43 wt% TiO₂, and in ppm 227 V, 100 Co, 240 Ni and 50 Zn. REE's were found at lower concentrations than in Martian meteorites, but in a range of 1 ppm observed in many stony achondrites (e.g. aubrites). La/Lu fractionation ratio is ~9 with linear decline between La and Lu and no Eu and Er anomalies.

Petrography: Thin sections that were examined showed some similarities to the NASA study of Alan

Hill 84001. Minerals were identified in the following volume fractions and main crystal size ranges: pyroxene 55-60%, 1-3 mm; olivine 35-40%, 0.5-2 mm locally up to 5 mm crystals partly altered to serpentine-magnetite ~1%, 0.3-0.7 mm particles. Pyroxene formed irregular crystals in the spaces between olivine crystals slowly formed during cooling.

Mössbauer spectra: The spectrum in Fig. 2 illustrates close similarity of our Mössbauer data and NASA data for Martian takhlite meteorite MIL 03346 [1]. Mössbauer spectra of stony meteorites usually consist of three doublets due to paramagnetic Fe²⁺ present in olivine and pyroxene [2] and two sextets due to magnetically ordered iron in magnetite. In our samples Fe²⁺ is in M1 and M2 sites of clinopyroxene (ferric diopside CaMgFeSi₂O₆) and in olivine (fayalite (Mg,Fe)₂SiO₄). The average values of quadrupole splitting for Fe²⁺ in 12 spectra analyzed vs. depth were: 2.59 mm/s in M1 site and 2.02 mm/s in M2 site of clinopyroxene; and 2.89 mm/s in fayalite.

Fig. 2. Mössbauer spectrum of 15-mm deep sample.

With the depth of samples from crust to ~20 mm inside the total fraction of Fe in cpx M1 and M2 sites increased from 20% to 40% and in fayalite from 10 to 15%; in magnetite it decreased from 65% to 15%, while the fraction of Fe³⁺, likely in a form of amphibole increased from 15% to 40%, see Fig. 3.

Fig. 3. Dependence of Fe fractions on sample depth.

Figure 5-18 above and below.

X-ray diffraction: Peaks in diffractogram of sample taken from ~15 mm inside the rock were assigned to ferroan diopside, sodium-tremolite i.e. amphibole richterite $(\text{NaCa})\text{Mg}_5\text{Si}_8\text{O}_{22}(\text{OH})_2$ and magnetite, in accord with Mössbauer spectra. Abundance of tremolite resembles that in Almahata Sata meteorite of asteroid origin. Remaining three diffraction peaks were ascribed to oxidized and reduced graphene.

Raman spectra: Taken with 532, 633 and 785 nm laser beams focussed to a 2 μm spots showed mostly bands of clinopyroxene P at 320, 660 and 1020 cm^{-1} , some bands of tremolite T, and likely very weak broad bands at 400 and 600 cm^{-1} of maskelynite from the impact.

Fig. 4. Raman spectra of the general area and of white feature shown in photograph below.

Fig 5. The photograph of the 2x3 cm polished area.

The white area in Fig. 5 showed prominent bands of nanodiamonds: D at ~1330 cm^{-1} due to structural defects and sp^3 bonds and G at ~1600 cm^{-1} from in plane vibrations of sp^2 bonded carbon atoms in graphene. Minor bands seen in top right corner of Fig. 4 between 2500 and 3300 cm^{-1} , are ascribed to the combinations of inelastic scattering bands observed in the first-order region [3]. The nanodiamonds as small as 2-7 nm were previously observed in carbonaceous meteorites, e.g., Allende. Such particles can be formed by CVD process or shocks at 1000-2300 K and 30-40 GPa.

Oxygen isotopes: The $\delta^{17}\text{O}$ and $\delta^{18}\text{O}$ values obtained for 3 samples taken near crust are close to terrestrial fractionation line at 0.523, but also close to the data for

lunar and 4 Vesta samples, whereas $\Delta^{17}\text{O}$ values are similar to those in angrites as shown below.

Fig. 6. Oxygen isotopes data compared with angrites.

However, as the oxygen isotopes near the surface of meteorites after long exposure to ^{18}O -rich sea water become closer to terrestrial [4] even small correction for $\delta^{18}\text{O}$ of -1‰ could relocate our data to the Martian area in $\delta^{17}\text{O}$ vs. $\delta^{18}\text{O}$ plot. Further analyses of bulk samples and separates from deep interior for comparison in particular with NWA 7035 data [5],[6] are necessary.

SEM-EDS and TEM: are being used now to identify CAI inclusions, C-N-P elements overlaps, graphite whiskers, iron veins and other microscopic features.

Conclusions: Analyses suggest that we have encountered a very interesting, differentiated, carbonaceous extraterrestrial object with nanodiamond including features. This could be the third largest Martian and largest not fractionated basaltic shergottite-type of trachlite-like meteorites ever found, possibly from celestial watery bodies [7],[8] or carbonaceous asteroids [9],[10],[11]. As the research in astrogeology and biochemistry of Martian and asteroid meteorites, rocks and soil and space missions intensify, we trust that this find can be quite significant and deserves further more thorough investigations.

Acknowledgments: We thank Actlabs in Ancaster, Ontario for chemical analysis; Dr. John G. Payne at Van Petro Ltd. Vancouver for petrography; Dr. Karen Ziegler at Institute of Meteoritics, University of Mexico for oxygen isotopes data; as well as Dr. Elaine C. Humphrey at Advanced Microscopy Facility and operators of CAMTEC XRD and Raman labs at University of Victoria for their very valuable contributions.

Figure 5-18 continued above: the Sawicki - Ebrahimi Paper

There are many pictures taken by our Mars landers that suggest primitive life growing on them, but the best photo that I have seen from there, showing both growth and reproduction, is Figure 5-19.

Life in space extends beyond viruses. These are puffballs (fungi) growing on Mars.

Sol 1145-left v Sol 1148-right). Comparing Sol 1145-left vs Sol 1148-right. Growth of fifteen Martian specimens over three days. Specimens labeled 1-5 and marked with red circles have increased in size. Those specified by arrows-Sol 1148-right-demarcate the emergence of ten new specimens which were not visible in Sol 1145-left photographed three days earlier by NASA/JPL. Differences in photo quality are secondary to changes in camera-closeup-focus by NASA. The majority of experts in fungi, lichens, geomorphology, and mineralogy agreed these are likely living specimens, i.e. fungi, puffballs. A **DISPROVED** alternate explanation is a strong wind uncovered hematite which had been buried beneath sand and dirt.

Photos taken by M.E.R. Opportunity. They were included as Figure 8 in Evidence of Life on Mars? by Joseph, Rhawn & Dass, Regina & Rizzo, Vincenzo & Cantisano, Nicola & Bianciardi, Giorgio. (Journal Of Astrobiology, 2019).

Figure 5-19 above: Probable life (puffballs, a type of fungus) growing on Mars. The alternate suggestion that we are seeing hematite buried by sand and uncovered by wind has been disproven.

The relationship between Wickramasinghe, Dr. Humphrey, and Ebrahimi becomes clear when reading the following emails.

Fri, 17 May 2019 at 00:13:

Hi Chandra,

I have a client, Craig Ebrahimi, who brought in a meteorite. At first, it looked like gabbro, but the chemical analysis (by Act Labs) proved it to be a meteorite. I understand that he sent you thin sections, outside crust, and a piece of the rock with an embryo fossil in a white circle. I have a very small sample for SEM and EDS. Craig suggested that if you have finished with his samples, is it possible to send them to me? Since I will be in the UK at the end of June for a month, I could pick them up. If you are still working with them, please keep us in the loop.

Best wishes,

Elaine

Dr. Elaine C. Humphrey, Fellow of Microscopy Society of America, Past President Microscopical Society of Canada

May 20, 2019 from Wickramasinghe:

Dear Elaine,

Unfortunately, the meteorite package was left in a shed near our house, and it appears to have been stolen. I do not have it anymore.

Sorry about this.

Sincerely,

Chandra Wickramasinghe

Reply-To: ncwick@gmail.com

Hi Elaine,

Our house was in chaos after some international travel, so I store all valuable things in an outhouse. Some months back, I discovered that many things, including the box with the meteorite, had

disappeared. I was waiting to get a colleague to handle the experiments on this, but it never happened. Sorry about this – not my fault.

Best,

Chandra

Prof. Chandra

Chandra,

Oh dear, that's too bad. Did you get any information out of them before they were stolen? If so, have you published them?

Elaine

I don't have his direct response to her last question, but he was publishing up the kazoo in conjunction with what he learned from the meteorite. He just *forgot* to include Craig Ebrahimi's name as the owner of the rock.

The ELS reference is 50513 characters between rows.
The matrix starts at Genesis 3:13.42 and ends at Leviticus 6:8.21.
The matrix spans 1,363,871 characters of the surface text.
The matrix has 28 rows, 20 columns and contains 560 characters.

LIVE ALIEN EMBRYO is encoded with **WUHAN** at the same skip. **GILEAD** makes remdesivir in **CHINA**. **GILEAD** and **CHINA** are at skip +1. **UFO** at skip -1 shares a letter *ayin* with **LIVE ALIEN EMBRYO**. There is evidence that such an embryo reached China and caused COVID-19.

DID ELON MUSK VISIT EBRAHIMI AND HIS METEORITE?

Here we examine email, local news coverage, and Torah Code evidence that on August 6, 2019, Elon Musk traveled to Sooke, BC, Canada, or within a few minutes of it, to meet Craig Ebrahimi, an alleged alien, who tried to sell him a meteorite. It supposedly contains 16 fossils of alien (possibly Reptilian) embryos.

Figure 5-23 above: This is the only matrix that I could find with **ELON MUSK** on it (as the axis term) and a transliteration of **EBRAHIMI** that was formed with **Abraham** in the open text, followed by a letter *alef* (*yud* would also work) that can be read as a hard *e* when a dot (*chiriq*) is assumed to be implied under the *alef*. Vowel signs are not included in a hand-written Torah scroll but are included in book versions.

Terms (found *a priori*) on the matrix that were worthy of a statistical calculation start with a short transliteration of **MARS**. The planet is not only on the matrix at skip +1 against odds of about 174 to 1. It has an interesting location. It's in sequence with and after **AND THEY TRAVELED...(MARS)**. Musk not only wants to live there but to die there (just not on the landing). If, as I suspect based on remarks by Israeli Brigadier General Haim Eshed, it's true that we have a joint top-secret U.S.-alien base on Mars, Musk may have to worry about his mission with respect to **SABOTAGE** by a Deep State/Fourth Reich government. **SABOTAGE** is four columns directly to the right of and at the same absolute skip as **ELON MUSK**. A transliteration of **HITLER** touches two letters of **ELON MUSK**. The same **HITLER** also touches two letters of **SABOTAGE**. **CHINESE** is also on the matrix at skip +1. The **CHINESE** will be our primary competition unless we are already there. Further, on December 27, 2019, the Chinese press covered the story of Craig's meteorite.

The importance of Sooke is twofold. It's the town that Craig lives in, and, since his photo shows him wearing something like military insignia allegedly seen on aliens in the 1954 meeting between Eisenhower and ETs, Sooke might be the home of more aliens than just **Ebrahimi**. I could not find **COVID**, **plague**, or **virus** on the matrix, but **GERM** is there. Musk is a rocket man, and **ROCKET** is there. However, it's easier to find **ROCKET** than to call a coin toss correctly. As for **EBRAHIMI**, he had to be on the matrix

for me to publish it. He was found at skip +1 again, odds of about 7.35 to 1. I would have thought that the name would be more significant, but in Hebrew, the first five of the six letters of his name are simply **ABRAHAM**. He is a major focus of Torah. His name appears at skip +1 some 151 times. His earlier name, **ABRAM**, also appears 60 times, but that 4-letter name lacks the letter *hey* necessary to form **EBRAHIMI**. Overall, odds against this matrix were about 31,253,037 to 1. This does not factor in the axis term (Elon Musk). The **Codefinder** software that I use indicates an R-factor of 0.061. This means that it only had about an 86.9% chance to be found at least once at an ELS in Torah. In fact, there is just one ELS of the name in the wrapped Torah. It's at a skip of -72,286, which means that the computer had to make more than one pass through the 304,805 letters of Torah to find Sooke.

Above: Spreadsheet showing odds against Figure 5-23.

IS CRAIG EBRAHIMI A CANADIAN REPTILIAN? See Figure 5-24 and its spreadsheet below.

With CANADIAN REPTILIAN as the axis term, a transliteration of EBRAHIMI is to the right of it. UFO is at the same skip as the axis term. DISEASE, SKY, PERMISSION, and RUSSIAN are at the same absolute skip.

Figure 5-24 above. CANADIAN REPTILIAN is the axis term. First, let's look at an 18-row by 24-column (432-letter) area including and around CANADIAN REPTILIAN. Terms at the same absolute skip of CANADIAN REPTILIAN include UFO, SKY, and RUSSIAN. I have no evidence that Ebrahimi was working with the Russians, so this term requires its own spreadsheet to analyze. It is noted just because the Code may be warning us about them here. Also at the same skip is PERMISSION, which shares a letter resh with THE MURDERER (open text). I have evidence that Craig was involved with spreading the COVID DISEASE, which killed at least 18 million people. He basically claims that other aliens sent him directions (coordinates) for finding his 27-pound meteorite, which appears to be the source of the virus. DISEASE is also at the same absolute skip of CANADIAN REPTILIAN, but it only shows up on the larger, 880-letter matrix. USA and HITLER are both one skip off that of the axis term.

If we just look at the 432-letter matrix without RUSSIAN, it was found against odds of about 5,265,921 to 1. If RUSSIAN turns out to be a valid term (against odds of about 101 to 1), then odds for this matrix grow to about 1.6 billion to 1 if we include the 8-letter axis term. On the larger, 880-letter matrix, with no Russian, total odds against it are about 19.2 million to 1. This axis term, and what I heard from Craig, seems to indicate that there is a colony of Reptilians living near or around Craig. The picture shown on Figure 5-24 shows a UFO that was shot down by a U.S. aircraft over Canada. **Is there any evidence to support the claim that there is a reptilian colony in Canada?** On May 9, 2025, I got a print-screen of the Table below. It revealed that in all the world so far that month, Canada ranked number 2 with 1,538 pages of my research read. Only the U.S. had read more so far, with 6,443 pages. It might turn out that many of my readers there are ETs who are worried about me revealing their identity.

Craig Ebrahimi, as noted above, claimed to be an alien. Specifically, after an argument with me, he sent me this email on March 27, 2020:

On Fri, Mar 27, 2020 at 4:43 PM Craig Ebrahimi craigebrahimi@hotmail.com wrote:

"Guy, your dumb ass shit keeps getting sent to me by one of your Hebrew followers. You got to be one of the biggest dummy humans I ever came across. You talk this shit in your writing ABOUT my biotechnology, once again you're dumb! You don't even know you're dealing with

“fucking real extra-terrestrial self-made multi-millionaire since teens, you idiot. If you looked into these eyes, I would eat your soul, puppet boy.”

How does the Canadian government view Craig? I had a phone conversation about it on or around December 29, 2020. In checking my email record with him (in chapter 6), I see:

“Craig reports that the Canadian Royal Police are stopping him every week and that he is afraid to leave Canada for fear that they will not let him back in. I surmise that Fort Huachuca is likely keeping him under their thumb, but they have yet to contact me directly to confirm it.”

Hostile reptilians in Canada may be the real reason why President Trump wants to acquire Canada.
